EXPERIENCE OVERVIEW

- Proficient in multiple high-level languages and frameworks.
- Creative mind for design and flow to ensure projects look as well as they function.
- Outstanding attention to detail, ensuring projects are complete and functional when presented.
- Team player attitude when tackling collaborative projects.
- Analytically driven, adept at interpreting complex information to identify patterns, employing a methodical approach to problem-solving and decision-making to optimize project efficiency and performance.

PROFESSIONAL SKILLS

Development:	JavaScript, Python, C#, Kotlin, SQL
Frameworks:	React, Next.js, Node.js, Bootstrap
Libraries:	Axios, Lodash, Pandas
Notable Skills:	Data Analytics, AI Prompt Engineering, Technical Literacy
Project Management:	GitHub, Atlassian Jira
Creative:	Photoshop, Figma, Premiere Pro, Blender, Unity Engine

EMPLOYMENT HISTORY

Software Developer — Avant Assessment Nov 2022 – Jul 2023

Skillset: AI Prompt Engineering · Quality Assurance · Debugging Code · SQL database operations

Job Duties:

- Collaborating with other developers on our team to track the advancement of various projects and refine code for deployment.
- Direct involvement in initial product testing, debugging, and ensuring quality assurance. Documented potential issues encompassing UI, inclusive language, and security vulnerabilities.
- Actively engaging in feature development, utilizing problem-solving skills and innovative strategies to enhance user experience and software performance, while ensuring adherence to schedules for major releases and urgent fixes.

Web Developer Intern — Prosper IT Consulting Jul 2021 – May 2022

Skillset: Front-End Development · Back-End Development · Bootstrap · Project Management

Job Duties:

- Developing tailor-made web pages that meet the specific requirements and specifications of the customer.
- Practical hands on experience in working with database structures and retrieving information from databases.
- Implementing secure coding practices to fortify our code against targeted malicious attacks or injections, ensuring robust and resilient code quality.

Data Specialist — Platt Electric Jan 2018 – Jul 2021

Skillset: Excel Data Management · Data Analysis · Reporting and Visualization · Inventory Control

Job Duties:

- Querying and organizing large sets of data and using various Excel functions and features for effective data management.
- Using formulas, pivot tables, and other analytical tools to derive insights, patterns, and trends from the inventory and company information.
- Producing comprehensive reports, summaries, and visually impactful representations such as charts and graphs using Excel to effectively communicate data insights, facilitating informed decision-making processes for the company.

EDUCATION

Software Development Technical School — The Tech Academy Sept 2022

Engaging classes covering multiple sought-after programming languages, offering daily practical coding immersion and participating in practical team projects focused on real-world application.

Mechanical Engineering — Mount Hood Community College June 2015

Foundational coursework in Mechanical Engineering encompassing fundamental principles and core concepts in physics, mathematics, and engineering design. Engaged in hands-on projects and labs to explore real-world applications within the discipline.
